Unit 7 Lesson 16: Dividing Rational Numbers

1 Tell Me Your Sign (Warm up)

Student Task Statement

Consider the equation: -27x = -35

Without computing:

- 1. Is the **solution** to this equation positive or negative?
- 2. Are either of these two numbers solutions to the equation?

35	35
27	$-\frac{1}{27}$

2 Multiplication and Division

Student Task Statement

1. Find the missing values in the equations

a. $-3 \cdot 4 = ?$ b. $-3 \cdot ? = 12$ c. $3 \cdot ? = 12$ d. $? \cdot -4 = 12$ e. $? \cdot 4 = -12$

2. Rewrite the unknown factor problems as division problems.

- 3. Complete the sentences. Be prepared to explain your reasoning.
 - a. The sign of a positive number divided by a positive number is always:
 - b. The sign of a positive number divided by a negative number is always:
 - c. The sign of a negative number divided by a positive number is always:
 - d. The sign of a negative number divided by a negative number is always:
- 4. Han and Clare walk towards each other at a constant rate, meet up, and then continue past each other in opposite directions. We will call the position where they meet up 0 feet and the time when they meet up 0 seconds.
 - Han's velocity is 4 feet per second.
 - ° Clare's velocity is -5 feet per second.
 - a. Where is each person 10 seconds before they meet up?
 - b. When is each person at the position -10 feet from the meeting place?

3 Drilling Down

Student Task Statement

A water well drilling rig has dug to a height of -60 feet after one full day of continuous use.

- 1. Assuming the rig drilled at a constant rate, what was the height of the drill after 15 hours?
- 2. If the rig has been running constantly and is currently at a height of -147.5 feet, for how long has the rig been running?
- 3. Use the coordinate grid to show the drill's progress.

												hour	5
	0	1	0	20	30	40	50	60	70	80	90	100	
	-50												
	-100												
	-150												
	-200												
feet	-250												

4. At this rate, how many hours will it take until the drill reaches -250 feet?
