Mathematics

## Lesson 6: Division as an Unknown Factor

- Let's connect division equations to multiplication equations.

## Warm-up: Notice and Wonder: Missing Numbers

What do you notice? What do you wonder?
$3 \times ?=12$
$12 \div 3=$ ?

## 6.1: Equations about Onions

A farmer puts 14 onions into 2 bags, with the same number of onions in each bag.
Lin says the situation should be represented by the equation:

$$
2 \times \square=14
$$

Mai says the situation should be represented by the equation:

$$
14 \div 2=\square
$$

Whose equation do you agree with? Be ready to explain your reasoning.

## 6.2: At the Farmers' Market

Complete each row. Be prepared to explain your reasoning.

| situation | drawing or diagram | multiplication equation | division equation |
| :---: | :---: | :---: | :---: |
| Elena's family buys 18 avocados at the farmers market. The avocados are in bags of 3 each. | $\begin{array}{l\|l\|l\|} \begin{array}{\|c\|c\|} 0^{0} & 0^{0} \\ 0^{0} \\ \hline 0^{0} & 0^{0} \\ 0^{0} \end{array} \end{array}$ |  | $18 \div 3=$ |
| Andre sees 25 tomatoes. They are in 5 bunches. Each bunch has the same number of tomatoes. |  | $5 \times ?=25$ | $25 \div 5=$ ? |
| Lin orders 6 banana fritters. The fritters are served on 2 plates and each plate has the same number of fritters. | $0^{0} 0^{0}$ | $2 \times ?=6$ |  |
|  | $\begin{aligned} & 00000 \\ & 00000 \\ & \hline 00000 \\ & \hline 000000 \\ & 00000 \end{aligned}$ | $\ldots \times 10=30$ | $30 \div 10=$ |
