

Lesson 16 Practice Problems

- 1. A circle with a 12-inch diameter is folded in half and then folded in half again. What is the area of the resulting shape?
- 2. Find the area of the shaded region. Express your answer in terms of π .

3. The face of a clock has a circumference of 63 in. What is the area of the face of the clock?

(From Unit 5, Lesson 15.)

- 4. Which of these pairs of quantities are proportional to each other? For the quantities that are proportional, what is the constant of proportionality?
 - a. Radius and diameter of a circle
 - b. Radius and circumference of a circle
 - c. Radius and area of a circle
 - d. Diameter and circumference of a circle
 - e. Diameter and area of a circle

(From Unit 5, Lesson 15.)

5. Find the area of this shape in two different ways.

- 6. Elena and Jada both read at a constant rate, but Elena reads more slowly. For every 4 pages that Elena can read, Jada can read 5.
 - a. Complete the table.

pages read by Elena	pages read by Jada
4	5
1	
9	
е	
	15
	j

b. Here is an equation for the table: j = 1.25e. What does the 1.25 mean?

c. Write an equation for this relationship that starts e = ...

(From Unit 5, Lesson 2.)
