

# Lesson 15: Grupos iguales, números más grandes

## Standards Alignments

Addressing 3.MD.C.7.c, 3.OA.A.3, 3.OA.B.5

Building Towards 3.OA.C.7

## Teacher-facing Learning Goals

- Multiply within 100, where one factor is a teen number.

## Student-facing Learning Goals

- Resolvamos algunos problemas de grupos iguales que tienen números más grandes.

## Lesson Purpose

The purpose of this lesson is for students to multiply within 100, where one factor is a teen number.

The work of this lesson connects to previous work because students have seen a variety of ways to represent and solve problems in which one of the factors is a teen number. In this lesson students use their choice of strategy and representation to solve these types of problems. Students participate in a gallery walk to highlight different ways that they solved problems with a synthesis that highlights the area diagram to represent one of the problems. Students' attention is drawn to scaling of area diagrams during the warm-up. While it's not important that student representations are exact, it is important that any area diagrams presented to students are to scale.

## Access for:

### Students with Disabilities

- Engagement (Activity 1)

### English Learners

- MLR8 (Activity 2)

## Instructional Routines

Which One Doesn't Belong? (Warm-up)

## Materials to Gather

- Base-ten blocks: Activity 1
- Sticky notes: Activity 2
- Tools for creating a visual display: Activity 1

## Materials to Copy

- Centimeter Grid Paper - Standard (groups of 2): Activity 1

## Lesson Timeline

Warm-up	10 min
Activity 1	20 min
Activity 2	15 min
Lesson Synthesis	10 min
Cool-down	5 min

## Teacher Reflection Question

What question do you wish you had asked today? When and why should you have asked it?

---

## Cool-down (to be completed at the end of the lesson)

 5 min

### Standards Alignments

Addressing 3.OA.A.3

### Student-facing Task Statement

Un rectángulo mide 6 pies por 15 pies. ¿Cuál es el área del rectángulo? Explica o muestra tu razonamiento.

### Student Responses

90 square feet. Sample response:  $6 \times 10 = 60$ ,  $6 \times 5 = 30$ ,  $60 + 30 = 90$
